

Fluency

Complete these questions.

1. $487 - 90 =$

[Reveal answer](#)

2. $= 3705 + 7289$

[Reveal answer](#)

3. $132 \div 11 =$

[Reveal answer](#)

4. $307 \times 36 =$

[Reveal answer](#)

5. $435.7 - 76.48 =$

[Reveal answer](#)

6. $12.7 \div 100 =$

[Reveal answer](#)

Problem Solving

Pavel chooses a number less than 40. He divides it by 2 and then adds 8. He then divides this result by 4. His answer is 6.5. What number did he start with?

[Reveal answer](#)

Reasoning

Place these values in ascending order.

5.09 1.56 4.003 20.03

Explain your reasoning.
